Profile

Full-Stack Developer with 8+ years of experience designing, developing, and maintaining web and mobile applications. Proficient in building scalable backend systems, developing intuitive user interfaces, database management, API integration, and writing clean, maintainable code. Experienced in taking projects from concept to production, troubleshooting complex issues, and implementing new features that enhance performance, functionality, and user experience.

Professional Experience

Aug 2024 – Present
Aba, Nigeria

Mobile App Developer, *Abapower - APLE*
- Developed a customer-facing electricity payment mobile application (Abapower Nkeanyi) using Flutter, enabling customers to conveniently purchase electricity tokens.
- Designed and implemented the mobile frontend, providing customers with a seamless and intuitive experience for purchasing electricity and managing their electricity payments.
- Integrated the application with backend services through REST APIs to enable secure communication, transaction processing, and real-time data exchange.

Aug 2024 – Present
Aba, Nigeria

Mobile App Developer, *Geometric Power Limited - GP*
- Developed a comprehensive employee management mobile application (Smart WorkForce – SWF) using Flutter for Android and iOS.
- Designed and implemented multiple core modules, including Attendance Management, Asset Enumeration, Customer Enumeration, Metering, and other workforce management functionalities.
- Integrated essential services such as location tracking, push notifications, map navigation, and file storage to support seamless field operations.
- Delivered a modern, intuitive, and consistent user interface with a focus on usability, performance, and a smooth user experience.

Sep 2026 – Present
Ikeja, Lagos

Mobile App Developer, *LuliFiber - GoxHR*
- Designed and developed the GoxHR employee management mobile application for LuliFiber using Flutter, delivering a modern and intuitive platform for workforce management and employee self-service.
- Implemented key employee functionalities, including attendance tracking, clock-in/clock-out, leave management, employee profiles, requests, notifications, and access to important HR information.
- Integrated the mobile application with backend services through REST APIs, ensuring seamless data synchronization, secure communication, and reliable interaction with the GoxHR HR management system.

Sep 2023 – Present
Port Harcourt

Mobile App Developer, *Easy Pay Bills*
- Designed and developed two Flutter mobile applications for Easy Pay Bills NG: a customer-facing app and an agent app, providing convenient access to digital payment and financial services.
- Implemented core functionalities, including airtime and data purchases, electricity bill payments, wallet management, and other bill payment services, with dedicated features for customers and agents.

- Integrated both applications with backend services through REST APIs, enabling seamless transactions, account management, and reliable communication with the platform's financial infrastructure.

May 2026 – Jul 2026
Nigeria

Mobile App Developer, *Mamihub*
- Created and designed a functional mobile e-commerce app using flutter and dart
- Implemented Payment integration, clean architecture, Vendor Dashboard

Jun 2026 – Aug 2026
Nigeria

Website Developer, *Velcro*
- Developed a fintech web platform (Velcro Pay) from the ground up, implementing both frontend and backend functionalities using Next.js and PHP.
- Integrated third-party financial services and payment platforms to enable seamless financial transactions and enhance the platform's capabilities.
- Built and maintained core system functionalities, ensuring efficient backend processing and reliable communication with external financial APIs.

Sep 2024 – Present
Nigeria

WhatsApp Flow Developer, *VelcroPay*
- Adapted core mobile application functionalities into an interactive WhatsApp-based experience, implementing WhatsApp Flows and integrating them with backend services.
- Designed and developed the backend infrastructure powering the WhatsApp banking platform, ensuring seamless communication between WhatsApp, financial services, and internal systems.
- Led the development of the banking system from the ground up through production deployment, delivering a fully functional platform serving over 1000 active users.

2025 – Present
Nigeria

Mobile App Developer, *Candleweb*
- Implemented Figma Design into a mobile app
- Implemented Crypto design and functionality

Nov 2024
Nigeria

Mobile App Developer, *Shuga Entertainment*
- Designed and Develop an Event Platform
- Implemented livestreaming and ticketing feature
- Deployed to Google play & Apple store

Aug 2023 – 2025
Port Harcourt, Nigeria

Mobile App Developer, *VelcroPay*
- Created a fintech mobile application from scratch using flutter dart
- Implemented backend service using firebase according to clients preferences
- Incorporated thirdparty service eg Gift Card, SME. into the app

Feb 2023 – Aug 2023
Abuja, Nigeria

Frontend Developer, *Candleweb*
- Created a web3 crypto website from scratch
- Worked with a backend developer and UI/UX designer to build the app
- Add a web3 smart contract functionality to make crypto payment
